

Vampire Flight Test Center - Kahoolawe

What little is known about this hush-hush facility on the uninhabited island of Kahoolawe has been pieced together from rumors and grainy photographs. The world class airfield sports a 15,100 main runway and tests some of the world most advanced aircraft.

The flight test pilots based here are among the most coddled workers in the world, with salaries in the high eight figures and the exclusive use of a fleet of long range executive jets.

Airport Information:

Location: N20* 31.9300', W156* 39.9478'.

Elevation: 135 feet

Runways: **18/36** – 15,100 feet in length, asphalt. **09/27** = 8,000 feet in length, asphalt
