

**Cassidy International (PLCH)
Kiritimati (Christmas) Island, Kiribati**

Christmas Island is about 1200 miles south of the Hawaiian Islands and it's chief notoriety is that it was the site of British atomic bomb tests back in the 50's and early 60's.

Some liberties were taken while making this scenery. This FSX version has lush vegetation and also sports a luxury oceanfront hotel for the pilots. The real island is quite arid and the only hotel is a small one which on the beach near the airport.

Only the airport is modeled, the remainder of the island is default FSX.

You will need to have installed the libraries on the web page below to see all of the objects.

http://navyair.com/SEA_Scenery/SEA_Sceneries.htm

CAUTION: Heavy bird populations around the airport vicinity!

Airport Information

Location: N1° 59.17' W157° 21.05'
